

CUSTOMER TECHNICIAN TRAINING

JACOBSSEN UNIVERSITY 2011 SESSIONS I,II & III

WHO SHOULD ATTEND:

All new technicians, experienced technicians or equipment managers who are interested in receiving additional training in electrical and hydraulic theory, troubleshooting, preventative maintenance practices and seeing some of the most current machine designs

COURSE DESCRIPTION:

- Basics of electrical and hydraulic theory
- Electrical and hydraulic circuitry and system concepts
- Electrical and hydraulic engineering symbols
- How to read and understand schematics
- Electrical and hydraulic system components
- Electrical and hydraulic schematic overview
- Understand the separate systems in a machine to reduce the appearance of complexity and to speed the process of system fault assessments
- Through hands-on exercises students will develop an understanding of the machine electrical and hydraulic systems
 - Hands-on hydraulic field testing exercises
 - Hands-on electrical troubleshooting exercises with a multimeter
- Troubleshooting - isolating the problem and repair vs. replace decisions
- Reel Technology with hands-on exercises including grinding
- New Jacobsen product overview

SCHEDULE (3-DAY SESSION):

Session I November 8th thru November 10th, 2011

Session II November 15th thru November 17th, 2011

Session III December 13th thru December 15th, 2011

PRODUCTS TO BE COVERED:

- Eclipse 322
- AR-522
- LF-34/3800
- Jacobsen 5" & 7" diameter reels

COURSE DESCRIPTION:

\$600.00 double occupant, \$800.00 single occupancy (includes course material, 3 nights hotel stay, transportation from airport to hotel and to Jacobsen University, breakfast, lunches, breaks and two dinners). All other expenses are the responsibility of the attendees.
